

Juniper Ridge, Jumbo Peak

Road 2904 trailhead: 18 miles total, 4,900' gained

Road 2324.063 trailhead: 7 miles total, 1,500' gained

From 2904: Proceed from the south side of the small lot uphill through the forest for about 3 miles to Juniper Peak. Follow the exposed ridge for some distance, descending into the forest and passing by a small pond (probably dry in summer) a couple miles further on. Ascend from this point to the first Sunrise trail (#262A) junction, about 6 ½ miles from the lot. Descend about ¾ mile – passing #262 - to a flat (Cow Camp), then uphill again for a bit less than 2 miles to the west side of Jumbo Peak. Return the way you came.

From 2324.063: Follow #262 up and then down about 1 ½ miles to the junction with #261. Go left, briefly downhill and then up for a bit less than 2 miles to the west side of Jumbo Peak. Additional wandering – including a scramble to the top of Jumbo - is a possibility from this point. Return the way you came. Note a side trip to the summit of Sunrise Peak is also a choice.
