

Silver Star Mountain

7 miles total, 2,000' gained

Find the trailhead immediately across from the parking area. Proceed uphill (passing by the Tarbell Trail; see Silver Star loop hike) for a mile or so. Level out and skirt under Pyramid Rock, then uphill for another mile or so.

At the four-way junction, go straight ahead (right is Indian Pits, left is for the loop).

Go uphill a short distance to another junction; turn right (left is Ed's trail/north trailhead).

Complete a switchback, going left at the saddle; Silver Star is the northerly hump.

For the return, proceed downhill the way you came up (left at the first junction, then straight at the second, four-way).
